

Nom de l'appareil

LWD 90A

**Légende:**

- $\dot{V}_{HW}$  = Débit eau chaude
- Temp<sub>wQ</sub> = Température source de chaleur
- Qh = Puissance calorifique
- Pe = Puissance absorbée
- COP = Coefficient of performance / coefficient de performance
- $\Delta p_{HW}$  = Perte de pression pompe à chaleur
- VD = Compresseur(s)
