

Nom de l'appareil

SWC 142H(K)3

Légende:

V _{HW}	= Débit eau chaude
V _{WQ}	= Débit eau glycolée
Temp _{WQ}	= Température source de chaleur
Qh	= Puissance calorifique
Pe	= Puissance absorbée
COP	= Coefficient of performance / coefficient de performance
Δp _{HW} / Δp _{HW/K}	= Charge disponible circuit de chauffage/ Charge disponible circuit de chauffage avec refroidissement
Δp _{WQ} / Δp _{WQ/K}	= Charge disponible source de chaleur/ Charge disponible source de chaleur avec refroidissement
