

Nom de l'appareil

SW 302H3

Légende:

$\dot{V}_{HW}$	= Débit eau chaude
$\dot{V}_{WQ}$	= Débit eau glycolée
Temp _{WQ}	= Température source de chaleur
Qh	= Puissance calorifique
Pe	= Puissance absorbée
COP	= Coefficient of performance / coefficient de performance
Δp_{HW}	= Perte de pression circuit de chauffage
Δp_{WQ}	= Charge disponible source de chaleur
