

Nom de l'appareil

SWP 581

Légende:

- $\dot{V}_{HW}$ = Débit eau chaude
- $\dot{V}_{WQ}$ = Débit eau glycolée
- Temp_{WQ} = Température source de chaleur
- Qh = Puissance calorifique
- Pe = Puissance absorbée
- COP = Coefficient of performance / coefficient de performance
- Δp_{HW} = Perte de pression circuit de chauffage
- Δp_{WQ} = Perte de pression source de chaleur
- VD = Compresseur(s)
