

## Tipo apparecchio

SW 42H3

### Leggenda:

- $\dot{V}_{HW}$  = Flusso volumetrico acqua di riscaldamento
- $\dot{V}_{WQ}$  = Flusso volumetrico fonte di calore
- $Temp_{WQ}$  = Temperatura fonte di calore
- $Q_h$  = Rendimento termico
- $P_e$  = Potenza assorbita
- COP = Coefficient of performance / Indice di rendimento
- $\Delta p_{HW}$  = Perdita di pressione pompa di calore
- $\Delta p_{WQ}$  = Pressione libera fonte di calore
